and where disputants manifest increasingly diverse attributes and needs mediation for decades hovering at the edge of dispute resolution practice is now emerging as the preferred approach both in its own right and as an adjunct to arbitration. Mediation processes are sufficiently flexible to accommodate a range of stakeholders not all of whom might have legal standing in ways the formality of arbitration and litigation would not normally allow. Among mediation's many advantages are time and cost efficiencies sensitivity to cultural differences and assured privacy and confidentiality. This book meets the practice needs of lawyers confronted with cross border disputes now arising far beyond the traditional areas of international commerce such as consumer disputes inter family conflicts and disagreements over Internet based transactions. The author takes full account of mediation's risks and limitations primarily its lack of finality and uncertainty in relation to enforceability issues which will persist until the advent of appropriate international regulation.
