applied and conceptual problems An expansive answer section includes answers to most odd and even numbered problems
 Emphasis on technology and ODEs explores newer methods of computing differential equations covering the software
 systems tailored specifically to differential equations as well as Maple Mathematica and MATLAB New and updated features
 of this title New content includes a new application of differential equations to the life sciences in Application Module 6 4 The
 Rayleigh van der Pol and FitzHugh Nagumo Equations The SIR Model and COVID 19 Characterized by the same careful and
 thorough exposition found throughout the text this new unit gives students yet another perspective about differential
 equations Extensively revised design New use of full color enhances graphs and figures so that students can more easily
 discern different solutions in the figures Added marginal notes aid in understanding the mathematics in the text easier
 identification of application topics in the exercise set includes new run in problem titles new Your Turn headers in the
 Application Modules now clarify where the exposition ends and the students investigations begin 16 new Interactive Figures
 illustrate how interactive computer applications with slider bars or touchpad controls can be used to change initial values or
 parameters in a differential equation allowing students to immediately see in real time the resulting changes in the structure
 of its solutions Using a mouse or touchpad the initial point for an initial value problem can be dragged to a new location and
 the corresponding solution curve is automatically redrawn and dragged along with its initial point For examples see Figures
 1 3 5 and 3 2 4 Features of MyLab Math for the 6th Edition Additional Exercises with immediate feedback Over 1000
 assignable exercises are based on the textbook exercises and regenerate algorithmically to give students unlimited
 opportunity for practice and mastery MyLab Math provides helpful feedback when students enter incorrect answers and
 includes optional learning aids including Help Me Solve This View an Example videos and an eText New Set up Solve
 Exercises require students to describe how they will set up and approach the problem This reinforces conceptual
 understanding of the process applied in approaching the problem promotes long term retention of the skill and mirrors what
 students will be expected to do on a test Instructional videos provide meaningful support as a learning aid within exercises
 alongside key examples in the eText or for self study within the Video Resource Library Instructors can assign videos within
 MyLab homework use videos in class or offer as a supplementary resource on specific topics Early Alerts are now included
 with Performance Analytics and use predictive analytics to identify struggling students even if their assignment scores are
 not a cause for concern In both Performance Analytics and Early Alerts instructors can email students individually or by
 group to provide feedback Learn more about MyLab Math
