Catena,2013-06-06 The modern retail system has worked to dazzling effect From the 19th century store owners emerged from small beginnings to set in train an industry that has seen some operators become nationally even globally dominant Along the way they turned retailing into an art and then a science Now retailers in emerging markets appear to be repeating the story all over again except on a scale and at a speed beyond anything we have seen before Given all of this it can be hard for those who work in retailing to accept that the industry as we know it is living on borrowed time on the brink of transformation There is now an urgency with which conventional store based retailers must now act and the extent of the challenges this change represents in strategic organizational and above all technological terms Reshaping Retail sets out the driving causes current trends and consequences of a transformation in retail triggered by technology The changes go far beyond making items available for sale on the internet Starting by briefly setting the historical and business system contexts for retail and describe the role that technology has played in the creation of modern retail it then explains the underlying technological drivers behind the current revolution radical changes in the capacity of both hardware and software mobile telecommunications changes and the advances of the Internet Ultimately success will hinge on more than competence it will come down to a way of thinking Customer centricity will need to be valued not just by the store owner as in the past but also by all employees in the organization It will need to become embedded in their daily tasks The same applies to technology which must be at the center of the organization and recognized as such by everyone With a combination of extensive desk and field research interviews with leading retailers and technologists together with the real world experience of practitioners in this area Reshaping Retail will inspire and help store retailers to make the necessary transformation now to win in the new consumer driven world *Management and Marketing for Improved Retail Competitiveness and Performance* Santos, José Duarte,Pereira, Inês Veiga,Pires, Paulo Botelho,2023-07-28 The growth of companies online presences is an unquestionable reality However not everything goes online and the physical presences of companies continue to exist with the physical retail point of sale as a place for experimentation and immediate consumption brand showroom and support for online sales which are fundamental to the shopping experience Managing a retail point of sale implies acting on several fronts bearing in mind the market requirements the point of sale s brand strategy the strategies of the brands being sold and all other aspects

related to the management of a business while considering the specificities of a retail point of sale Management and Marketing for Improved Retail Competitiveness and Performance provides knowledge and skills to allow readers to understand and apply the different concepts techniques and tools to manage a retail point of sale in the various aspects of a business Covering key topics such as advertising client loyalty and merchandising this premier reference source is ideal for business owners managers marketers researchers scholars academicians practitioners instructors and students

The Digital Transformation in the Fashion Industry, 2020-09-10 Seminar paper from the year 2020 in the subject Business economics Business Management Corporate Governance grade 1 3 University of applied sciences D sseldorf language English abstract This paper will deal with the topic of digital transformation in the fashion industry The term digital transformation and the effects of digitization on the entire value chain will be explained and illustrated using the example of Zalando Over the last few years the effects of digitization have become more and more perceptible in the daily lives of fashion consumers New technologies and globalization open up new ways to consumption production and commerce and have fundamentally changed the consumer behaviour Therefore fashion companies need to adapt and transform their business strategies This is necessary in order to be able to stand up to new challenges take advantage of the opportunities offered by digitization and ensure sustainable corporate success So far innovations are being tested in many areas but few of the major fashion brands have managed a complete digital transformation in all areas of their value chain

Information Technology for Management: Current Research and Future Directions Ewa Ziemia, 2020-03-10 This book constitutes extended selected papers from the 17th Conference on Advanced Information Technologies for Management AITM 2019 and the 14th Conference on Information Systems Management ISM 2019 held as part of the Federated Conference on Computer Science and Information Systems FedCSIS which took place in Leipzig Germany in September 2019 The total of 7 full and 6 short papers presented in this volume were carefully reviewed and selected from a total of 45 submissions The papers selected to be included in this book contribute to the understanding of relevant trends of current research on and future directions of information technology for management in business and public organizations They were organized in topical sections named information technology assessment for future development methods and models for designing information technology and aspects of implementing information technology

Digital Transformation. The Realignment of Information Technology and Business Strategies for Retailers in South Africa Albert Mubako, 2017-08 Remaining competitive in the retail industry of South Africa in the digital age is a major business concern In the age of digital natives people are well connected on various digital technology platforms and are digital consumers Digital technologies offer retail organizations new

innovative ways to create value by utilizing digital business strategies processes and products This qualitative research study explores the perception of retail strategy experts and decision makers toward realignment of IT and business strategies considering digital transformation in South Africa Based on interviews with seven managers and decision makers in the retail industry the study reveals that digital technologies have disrupted traditional ways of doing business The study proposes eight major recommendations in which retail traders could innovate their business strategy to enhance value creation beyond traditional approaches to retailing It provides a good starting point for academic research in a domain that is deficient in theoretical and empirical research on the South Africa retail sector and offers retailing managers a conceptual model to guide them toward a digital business strategy for transient competitive advantages

The Challenge of Digitalization in Retail. The Retail Sector in Germany Yusuf Say, 2021-08-12 Studienarbeit aus dem Jahr 2021 im Fachbereich BWL Handel und Distribution Hochschule Fulda Sprache Deutsch Abstract In this work the author examines the retail sector in Germany to provide an overview of the reasons for change potential challenges and future predictions During the research it was found that very many reports exist around the topic and digitalization is a trending topic in retail Furthermore a study is covered that illustrates the shift in values from a consumer perspective The goal is to better prepare for the needs of customers In this study the question should be answered with which strategic measures the retailers must deal in the future to remain competitive The highly specialized and industrialized society is undergoing massive changes due to digitalization The high level of digitalization and the technical capabilities of machines are opening new opportunities The productivity development of the last centuries shows that the economy is currently in a particularly challenging phase This development is particularly due to the widespread internet connectivity through e g smartphones large storage capacities and technologies such as cloud or analytics that new applications and business opportunities can be implemented In the retail sector the question now arises on which facts the change in retail is built and on which the future of retail depends

Data Analytics for Decision Making towards Business Excellence Bhaskar Basu, Jitendra Kumar Jha, Indrajit Mukherjee, Raghu Nandan Sengupta, 2025-11-08 This edited volume collates discussions on latest challenges opportunities trends and practices applicable to two major business sectors retail and financial services and chapters are segregated accordingly It explores how these sectors are increasingly becoming data intensive and how ways of handling manipulating exploiting and evaluating data continues to change in this era of big data Part A of the book looks into better understanding of marketing metrics strategy theory and practice using retail analytics Topics being explored are inventory assortment and promotion effectiveness pricing strategies brand category switching and customer loyalty customer profitability customer engagement cross buying and up buying synergistic effects of online and offline channels and retail innovations effectiveness of different type of distribution channels customer experience service excellence failure recovery digitalization in retailing consumer behaviour and marketing in omni channel retail environments In Part B topics of relevance include financial aspects of data
