Technology Strategy and Management: Best Practices Chew, Eng K.,Gottschalk, Petter,2009-01-31 Describes the principles and methodologies for crafting and executing a successful business aligned IT strategy to provide businesses with value delivery The National Skills Development Handbook 2007/8 ,200? *ABA Banking Journal* ,1986-07 A *Wonderful Boss* Virender Kapoor,2017-01-23 Though the definition itself is somewhat derogatory that author has dispelled this notion through this book As a believer in the law of averages and quoting from his own experience of around forty years

the author says that there would be more good guys in organizational corridors of power than bad ones Yet there is big room for improvement for the good guys too A leader has a much larger role to play which affects performance and progress of the entire organization At the core of leadership lies vision mission direction wisdom sacrifice and also a moralistic stance In contrast the role of a boss is more hands on and largely revolves around and is focused towards people management and interpersonal relations with the employees of the organization The boss subordinate relationship becomes very personal and that is why one would say He is my boss and you will seldom get to hear anything like he is my leader It is the softer part of leadership which is the hardest to manage Putting it in another way a boss is in your immediate vicinity with whom you deal on a daily basis whereas a leader may be visible only from a distance During the Gilded Age in the 19th century in the United States bossism was a system of political control centering around a single powerful figure the boss The central figure had tremendous clout and influence in terms of political control In that context also boss was to do more with control and perhaps nothing to do with leadership In the modern environment bossism is about atmospherics which has a direct impact on a subordinate s performance as well his personal life and happiness too Therefore bossism is skewed more towards emotional intelligence rather than the IQ of a boss
