Discourse in Content and Language Integrated Learning (CLIL) Classrooms Christiane Dalton-Puffer, 2007 The label CLIL stands for classrooms where a foreign language English is used as a medium of instruction in content subjects This book provides a first in depth analysis of the kind of communicative abilities which are embodied in such CLIL classrooms It examines teacher and student talk at secondary school level from different discourse analytic angles taking into account the interpersonal pragmatics of classroom discourse and how school subjects are talked into being during lessons The analysis shows how CLIL classroom interaction is strongly shaped by its institutional context which in turn conditions the ways in which students experience use and learn the target language The research presented here suggests that CLIL programmes require more explicit language learning goals in order to fully exploit their potential for furthering the learners appropriation of a foreign language as a medium of learning

Content and Language Integrated Learning Yolanda Ruiz de Zarobe, Rosa María Jiménez Catalán, 2009-05-11 This book contributes to the growth of interest in Content and Language Integrated Learning CLIL an approach to second foreign language learning that requires the use of the target language to learn content Within the framework of European strategies to promote multilingualism CLIL has begun to be used extensively in a variety of language learning contexts and at different educational systems and language programmes This book brings together critical analyses on theoretical and implementation issues of Content and Language Integrated Learning and empirical studies on the effectiveness of this type of instruction on learners language competence The basic theoretical assumption behind this book is that through successful use of the language to learn content learners will develop their language proficiency more effectively while they learn the academic content specified in the curricula *Content and Language Integrated Learning* Yolanda Ruiz de Zarobe, 2017-10-02 This book explores some of the recent research

undertaken on Content and Language Integrated Learning CLIL It offers an overview of several European contexts describing experiences that could be extrapolated to many other communities worldwide Contributions focus on issues related to language policy moving from high level policymaking to grassroots decisions but all of them encompassing the major changes that can be recognized in education which also evidence the shifts in society and economic life that have taken place in Europe in the last decades These changes in language policy issues are coupled with changes in CLIL practice in the classroom These national initiatives are displayed across a wide range of educational perspectives portraying the diversity that is a distinctive feature of CLIL in the European educational mosaic By providing new insights into pedagogic methodological and language policy issues in CLIL and by covering some areas which have been insufficiently addressed in the literature such as the implementation of CLIL in less successful contexts or learner teacher collaboration in the classroom this book will be of great value to researchers stakeholders and professionals interested in CLIL and language education This book was originally published as a special issue of the International Journal of Bilingual Education and Bilingualism

by the researchers participating in this volume such as information processing sociocultural theory or conversation analysis widen the realm of investigation on discourse and language learning Finally the strength of the volume also lies in the range of educational settings primary secondary and tertiary education and the worldwide representation of contributors across seven different countries namely those of Spain France Austria Finland Germany Canada Australia and the United States The uniqueness of the volume is due to its eclectic and comprehensive nature in tackling instructional discourse Worldwide outstanding researchers like Julianne House Carme Muñoz Ute Smit Tarja Nikula or Roy Lyster to quote but a few adopt different perspectives in this joint contribution that will certainly broaden the scope of research on language learners discourse
