

Discourse Analysis for Language Teachers

DOUGLAS A. DEMO, CENTER FOR APPLIED LINGUISTICS

What Is Discourse Analysis?

Discourse analysis is the examination of language use by members of a speech community. It involves looking at both language form and language function and includes the study of both spoken interaction and written texts. It identifies linguistic features that characterize different genres as well as social and cultural factors that aid in our interpretation and understanding of different texts and types of talk. A discourse analysis of written texts might include a study of topic development and cohesion across the sentences, while an analysis of spoken language might focus on these aspects plus turn-taking practices, opening and closing sequences of social encounters, or narrative structure.

The study of discourse has developed in a variety of disciplines—sociolinguistics, anthropology, sociology, and social psychology. Thus discourse analysis takes different theoretical perspectives and analytic approaches: speech act theory, interactional sociolinguistics, ethnography of communication, pragmatics, conversation analysis, and variation analysis (Schiffrin, 1994). Although each approach emphasizes different aspects of language use, they all view language as social interaction.

This digest focuses on the application of discourse analysis to second language teaching and learning. It provides examples of how teachers can improve their teaching practices by investigating actual language use both in and out of the classroom, and how students can learn language through exposure to different types of discourse. Detailed introductions to discourse analysis, with special attention to the needs and experiences of language teachers, can be found in Celce-Murcia and Olshtain (2000), Hatch (1992), McCarthy (1992), McCarthy and Carter (1994), and Riggensbach (1999).

Discourse Analysis and Second Language Teaching

Even with the most communicative approaches, the second language classroom is limited in its ability to develop learners' communicative competence in the target language. This is due to the restricted number of contact hours with the language; minimal opportunities for interacting with native speakers; and limited exposure to the variety of functions, genres, speech events, and discourse types that occur outside the classroom. Given the limited time available for students to practice the target language, teachers should maximize opportunities for student participation. Classroom research is one way for teachers to monitor both the quantity and quality of students' output. By following a four-part process of Record-View-Transcribe-Analyze, second language teachers can use discourse analytic techniques to investigate the interaction patterns in their classrooms and to see how these patterns promote or hinder opportunities for learners to practice the target language. This process allows language teachers to study their own teaching behavior—specifically, the frequency, distribution, and types of questions they use and their effect on students' responses.

Step One: Videotape a complete lesson. Be sure to capture all of your questions and the students' responses. (Opportuni-

nities to speak the target language are often created by teachers' questions.)

Step Two: Watch the videotape. As you watch it, think about the types of questions you asked. Look for recurring patterns in your questioning style and the impact it has on the students' responses.

Step Three: Transcribe the lesson. A transcript will make it easier to identify the types of questions in the data and to focus on specific questions and student responses.

Step Four: Analyze the videotape and transcript. Why did you ask each question? What type of question was it—open (e.g., "What points do you think the author was making in the chapter you read yesterday?") or closed (e.g., "Did you like the chapter?")? Was the question effective in terms of your goals for teaching and learning? What effect did your questions have on the students' opportunities to practice the target language? How did the students respond to different types of questions? Were you satisfied with their responses? Which questions elicited the most discussion from the students? Did the students ask any questions? Focusing on actual classroom interaction, teachers can investigate how one aspect of their teaching style affects students' opportunities for speaking the target language. They can then make changes that will allow students more practice with a wider variety of discourse types.

Teachers can also use this process of Record-View-Transcribe-Analyze to study communication patterns in different classroom activities, such as student-to-student interactions during a paired role-play task and during a small-group cooperative learning activity. Communicative activities are expected to promote interaction and to provide opportunities for students to engage in talk. Teachers are likely to discover that students produce different speech patterns in response to different tasks. For example, a map activity is likely to elicit a series of questions and answers among participants, whereas a picture narration task requires a monologue developed around a narrative format. Given that teachers use communicative tasks to evaluate learners' proficiency, a better understanding of the influence of specific activities on learner discourse will likely lead teachers to use a greater variety of tasks in order to gain a more comprehensive picture of students' abilities. By recording, transcribing, and analyzing students' discourse, teachers can gain insight into the effect of specific tasks on students' language production and, over time, on their language development.

A discourse analysis of classroom interactions can also shed light on cross-cultural linguistic patterns that may be leading to communication difficulties. For example, some speakers may engage in overlap, speaking while someone else is taking a turn-at-talk. For some linguistic groups, this discourse behavior can be interpreted as a signal of engagement and involvement; however, other speakers may view it as an interruption and imposition on their speaking rights. Teachers can use the Record-View-Transcribe-Analyze technique to study cross-cultural interactions in their classrooms, helping students identify different communication strategies and their potential for miscommunication.

Handbook of Research on Educational Communications and Technology J. Michael Spector, M. David Merrill, Jan Elen, M. J. Bishop, 2013-07-03 The 4th edition of the Handbook of Research on Educational Communications and Technology expands upon the previous 3 versions providing a comprehensive update on research pertaining to new and emerging educational technologies Chapters that are no longer pertinent have been eliminated in this edition with most chapters being completely rewritten expanded and updated Additionally new chapters pertaining to research methodologies in educational technology have been added due to expressed reader interest Each chapter now contains an extensive literature review documenting and explaining the most recent outstanding research including major findings and methodologies employed The Handbook authors continue to be international leaders in their respective fields the list is cross disciplinary by design and great effort was taken to invite authors outside of the traditional instructional design and technology community *Understanding EAP Learners' Beliefs about Language Learning from a Socio-cultural Perspective* Chili Li, 2021-02-09 This book focuses on the dynamic nature of EAP English for academic purposes learners beliefs about language learning in their shift from an EFL English as a foreign language environment to an EMI English as the medium of instruction setting in mainland China It adopts a mixed method paradigm whose quantitative part aims to capture the general dynamic feature of the selected student population while its qualitative part attempts to unveil the process of change in beliefs about language learning among the sample It is hypothesized that the change in their beliefs about language learning is the result of the interplay between the learners agency and the mediation of the contextual realities at the institutional and social levels

Pedagogies for Autonomy in Language Teacher Education Manuel Jiménez Raya, Borja Manzano Vázquez, Flávia Vieira, 2024-06-28 This book aims to challenge established teaching cultures to promote teacher autonomy and autonomy oriented pedagogies in language teacher education Offering a set of inspiring case studies that illustrate language teacher education for autonomy as a space of multiple possibilities the book fuses theory and practice and gives a holistic view of the changing landscape of language teacher education accounting for the transformative power of educational practices that help teachers think and act in informed context specific and learner centred ways It also demonstrates the importance of autonomy in language teacher education contexts specifically to foster teachers professional learning identity and agency as well as in assessing and reshaping teacher education programmes This book will be particularly useful to researchers scholars and postgraduate students in the fields of teaching and teacher education modern foreign languages and teaching and learning language research more broadly Curriculum designers and language teacher education programme directors may also find the volume of use **Classroom Discourse Competence** Katrin Thomson, 2022-04-04 In language learning contexts the role of the language teacher is a particularly crucial one it is the teacher who through and with their use of the foreign language has a significant influence on the extent to which language learners are linguistically cognitively activated

and thus determines whether processes of language learning are initiated and promoted or perhaps even impeded or prevented. Thus it is of utmost importance for language teachers to acquire a high level of classroom discourse competence. CDC is a professional competence that goes far beyond the notions of FL proficiency and communicative competence. Located at the intersection of theory, classroom research, and practical approaches to EFL teacher education, Classroom Discourse Competence: Current Issues in Language Teaching and Teacher Education offers university students, trainee teachers, in-service teachers, and teacher educators a comprehensive conceptualization of CDC. Part I: Furthermore, the chapters in this book explore facets of CDC. Part II: and present good practice examples of CDC development in the context of pre-service teacher education. Part III: *Proceedings of the International Conference on Information Engineering and Applications (IEA) 2012* Zhicai Zhong, 2013-03-28. Information engineering and applications is the field of study concerned with constructing information computing intelligent systems, mathematical models, numerical solution techniques, and using computers and other electronic devices to analyze and solve natural scientific, social scientific, and engineering problems. Information engineering is an important underpinning for techniques used in information and computational science, and there are many unresolved problems worth studying. The Proceedings of the 2nd International Conference on Information Engineering and Applications IEA 2012, which was held in Chongqing, China, from October 26-28, 2012, discusses the most innovative research and developments, including technical challenges and social, legal, political, and economic issues. A forum for engineers and scientists in academia, industry, and government, the Proceedings of the 2nd International Conference on Information Engineering and Applications presents ideas, results, works in progress, and experience in all aspects of information engineering and applications. New Technologies and Language Learning Li Li, 2017-04-24. This research-led textbook investigates the use of new technologies for language learning, linking theory to practice. The book synthesizes previous technology use, including Computer Assisted Language Learning theory and research, and describes practical applications for both second and foreign language classrooms, including detailed examples of these applications and the procedures for evaluating them. *Proceedings of the International conference of Economics Business and Economics Education Science (ICE-BEES-24)* Kris Brantas Abiprayu, Avi Budi Setiawan, 2024-10-02. McGuire, 2023-09-18. This volume explores performative linguistic space, namely a space which ushers or hinders linguistic practices. Space is made productive as a result of individuals who bring linguistic politics from diverse spaces into new ones. By moving away from the notions of discrete units of language and linguistic communities associated with a specific space, this volume suggests a fluid, productive

aspect of space It goes beyond the assumed space linguistic community association through ethnographic accounts that mediate linguistic anthropology cultural geography sociolinguistics and deaf studies **e-Learning Ecologies** Bill Cope, Mary Kalantzis, 2017-02-17 e Learning Ecologies explores transformations in the patterns of pedagogy that accompany e learning the use of computing devices that mediate or supplement the relationships between learners and teachers to present and assess learnable content to provide spaces where students do their work and to mediate peer to peer interactions Written by the members of the new learning research group this textbook suggests that e learning ecologies may play a key part in shifting the systems of modern education even as technology itself is pedagogically neutral The chapters in this book aim to create an analytical framework with which to differentiate those aspects of educational technology that reproduce old pedagogical relations from those that are genuinely innovative and generative of new kinds of learning Featuring case studies from elementary schools colleges and universities on the practicalities of new learning environments e Learning Ecologies elucidates the role of new technologies of knowledge representation and communication in bringing about change to educational institutions *Transforming Teacher Preparation Through Identity, Development, and Effective Technologies* Sargent, Denise LaVoie, Murphy, Kristin M., 2024-08-09 In the landscape of global education there is a dire shortage of teachers exacerbated by declining enrollment rates and a mass exodus of educators particularly in urban settings UNESCO's revelation that millions of teachers are needed by 2030 underscores the critical gaps in our ability to provide quality education As the education sector grapples with these challenges *Transforming Teacher Preparation Through Identity Development and Effective Technologies* offers valuable solutions This compilation responds to the pressing need for a paradigm shift in teacher preparation offering insights recommendations and diverse perspectives from experts worldwide to address the current crisis and shape the future of education Teacher shortages and diminishing enrollment rates coupled with the departure of educators pose a significant threat to the quality of education globally Urban areas in particular witness a disproportionate exodus of educators creating disparities that impact the most vulnerable students The COVID 19 pandemic has further emphasized the need for innovative technology driven solutions in teacher preparation As schools deal with these issues the imperative is to not only reflect on the current state of teacher preparation but also to set forth recommendations that will transform the field ensuring a robust and resilient education system for the years to come
