Design of Reinforced Concrete Jack C. McCormac, Russell H. Brown, 2015-09-15 Design of Reinforced Concrete 10th Edition by Jack McCormac and Russell Brown introduces the fundamentals of reinforced concrete design in a clear and comprehensive manner and grounded in the basic principles of mechanics of solids Students build on their understanding of basic mechanics to learn new concepts such as compressive stress and strain in concrete while applying current ACI Code

Reinforced Concrete J. G. MacGregor, F. M. P. (Fred Michael Pearce) Bartlett, 2000 This book explains the theory and practice of reinforced concrete design in a systematic and clear fashion with an abundance of step by step worked examples illustrations and photographs The focus is on preparing readers to make the many judgment decisions required in reinforced concrete design and reflects the author's extensive experience and expertise as both a teacher of reinforced concrete design and as a member of various code committees For anyone interested in concrete structures and the design of reinforced concrete **Reinforced Concrete Design** Chu Kia Wang, 2002-09-01 **Reinforced Concrete Design, Sixth Edition**

Solutions Manual for Reinforced Concrete Technology Samuel E. French, 1993-01-01 *Reinforced Concrete Design* Svetlana Brzev, John Pao, 2012-10-23 Reinforced Concrete Design A Practical Approach 2E is the only Canadian textbook which covers the design of reinforced concrete structural members in accordance with the CSA Standard A23.3-04 Design of Concrete Structures including its 2005, 2007 and 2009 amendments and the National Building Code of Canada 2010 Reinforced Concrete Design A Practical Approach covers key topics for curriculum of undergraduate reinforced concrete design courses and it is a useful learning resource for the students and a practical reference for design engineers Since its original release in 2005 the book has been well received by readers from Canadian universities colleges and design offices The authors have been commended for a simple and practical approach to the subject by students and course instructors The book contains numerous design examples solved in a step by step format The second edition is going to be available exclusively in hard cover version and colours have been used to embellish the content and illustrations This edition contains a new chapter on the design of two way slabs and numerous revisions of the original manuscript Design of two way slabs is a challenging topic for engineering students and young engineers The authors have made an effort to give a practical design perspective to this topic and have focused on analysis and design approaches that are widely used in structural engineering practice The topics include design of two way slabs for flexure shear and deflection control Comprehensive revisions were

made to Chapter 4 to reflect the changes contained in the 2009 amendment to CSA A23.3-04. Chapters 6 and 7 have been revised to correct an oversight related to the transverse reinforcement spacing requirements in the previous edition of the book. Chapter 8 includes a new design example on slender columns and a few additional problems. Several errors and omissions both text and illustrations have also been corrected. More than 300 pages of the original book have been revised in this edition. Several supplements are included on the book web site. Readers will get time limited access to the new column design software BPA COLUMN which can generate column interaction diagrams for rectangular and circular columns of variable dimensions and reinforcement amount. Additional supplements include spreadsheets related to foundation design and column load take down and a few Power Point presentations showcasing reinforced concrete structures under construction and in completed form. Instructors will have an access to additional web site which contains electronic version of the Instructor's Solution Manual with complete solutions to the end of chapter problems and Power Point presentations containing all illustrations from the book. The book is a collaborative effort between an academic and a practising engineer and reflects their unique perspectives on the subject.

Svetlana Brzev, Ph.D., P.Eng, is a faculty at the Civil Engineering Department of the British Columbia Institute of Technology, Burnaby, BC. She has over 25 years of combined teaching, research and consulting experience related to structural design and rehabilitation of concrete and masonry structures including buildings, municipal and industrial facilities.

John Pao, M.Eng, P.Eng, Struct. Eng, is the President of Bogdonov Pao Associates Ltd. of Vancouver, BC, and BPA Group of Companies with offices in Seattle and Los Angeles. Mr. Pao has extensive consulting experience related to design of reinforced concrete buildings including high rise residential and office buildings, shopping centers, parking garages and institutional buildings.
