Handbook of Training Evaluation and Measurement Methods Jack J. Phillips, Patricia Pulliam Phillips, 2016-05-20 Today's economic climate means that anyone involved in training and development must be able to measure its effect on business performance With a focus on costs benefits and return on investment this book provides a comprehensive reference for those who are learning about or implementing an evaluation system This new edition is fully revised and updated to reflect current developments with step by step guidance on a range of vital topics including Developing a results based approach to HRD Evaluation design Data collection and measuring success Calculating program costs and ROI Increasing management support for HRD programs With end of chapter discussion questions and an accompanying online Instructor Guide this fourth edition provides sound theory and practical solutions The Handbook of Training Evaluation and Measurement Methods is a complete and detailed reference guide suitable for HRD professionals and students in advanced courses in HRD training evaluation and program evaluation *Rapid Prototyping of Application*

Specific Signal Processors Mark A. Richards, Anthony J. Gadiant, Geoffrey A. Frank, 1997-02-28 Rapid Prototyping of Application Specific Signal Processors presents leading edge research that focuses on design methodology infrastructure support and scalable architectures developed by the 150 million dollar DARPA United States Department of Defense RASSP Program The contributions to this edited work include an introductory overview chapter that explains the origin concepts and status of this effort The RASSP Program is a multi year DARPA Tri Service initiative intended to dramatically improve the process by which complex digital systems particularly embedded signal processors are designed manufactured upgraded and supported This program was originally driven by military applications for signal processing The requirements of military applications for real time signal processing are typically more demanding than those of commercial applications but the time gap between technology employed in advanced military prototypes and commercial products is narrowing rapidly The research on methodologies infrastructure and architectures presented in this book is applicable to commercial signal processing systems that are in design now or will be developed before the end of the decade Rapid Prototyping of Application Specific Signal Processors is a valuable reference for developers of embedded digital systems particularly systems engineers for signal processing systems such as digital TV biomedical image processing systems and telecommunications and for military contractors who are developing signal processing systems This book will also be of interest to managers who are charged with responsibility for creating and maintaining environments and infrastructures for developing large embedded digital systems The chief value for managers will be the defining of methods and processes that reduce development time and cost
