Guide to Reference in Medicine and Health

Christa Modschiedler, Denise Beaubien Bennett, 2014-04-26 Drawn from the extensive database of Guide to Reference this up to date resource provides an annotated list of print and electronic biomedical and health related reference sources including internet resources and digital image collections. Readers will find relevant research clinical and consumer health information resources in such areas as Medicine Psychiatry Bioethics Consumer health and health care Pharmacology and pharmaceutical sciences Dentistry Public health Medical jurisprudence International and global health. Guide to Reference entries are selected and annotated by an editorial team of top reference librarians and are used internationally as a go to source for identifying information as well as training reference professionals. Library staff answering health queries as well as library users undertaking research on their own will find this an invaluable resource. **Libraries Without Walls 6** Peter Brophy, Jenny Craven, Margaret Markland, Manchester Metropolitan University. Centre for Research in Library and Information Management, 2006 This edited collection is drawn from the sixth Libraries Without Walls Conference held in 2005. From their beginnings in 1995 the Libraries Without Walls conferences have mapped a major change in the practice of librarianship. While library services are still concerned to provide users with physical access to their buildings electronic access often from remote locations is becoming ever more dominant. Papers presented at previous LWW conferences have provided examples of how libraries are pushing out the frontiers of their services. In 2005 a different approach was taken. The question was asked: How do we know whether these new services are having a positive impact on our users? In response papers written by leading professionals worldwide followed these broad themes: theoretical approaches to the evaluation of the new services with an emphasis on qualitative methods; the user experience; what do we know about the users of these

services assessment of the usability including the accessibility of the services measuring the outcomes and impact Readership These state of the art papers will enable library managers and information professionals in all sectors to keep abreast of the latest developments in this vital area The book will also assist educational specialists and course developers in increasing their understanding of the role and importance of information in the learning process **Scholarly Digital Editions as Interfaces** Roman Bleier, Martina Bürgermeister, Helmut W. Klug, Frederike Neuber, Gerlinde Schneider, 2018-11-15 Interfaces are important elements of digital scholarly editions as they allow and direct the interaction of users with the online content and they facilitate the access to and exchange of data and information Some interfaces are created for the human user GUI others for machine interaction and data exchange API Both aspects of interfaces and their roles in digital scholarly editing were discussed at a conference in 2016 organised by the Centre for Information Modelling at the University of Graz and the Digital Scholarly Editions Initial Training Network DiXiT This volume includes a range of papers presented at the conference that highlight the diverse views and approaches towards interfaces in the digital scholarly editing community **A Dictionary of Computing** Oxford University Press, 2004 Searchable dictionary database of computer terminology covering computer applications in industry the office science education and the home the hardware software and telecommunications behind these applications *Artificial Unintelligence* Meredith Broussard, 2019-01-29 A software developer's misadventures in computer programming machine learning and artificial intelligence reveal why we should never assume technology always get it right In *Artificial Unintelligence* Meredith Broussard argues that our collective enthusiasm for applying computer technology to every aspect of life has resulted in a tremendous amount of poorly designed systems We are so eager to do everything digitally hiring driving paying bills even choosing romantic partners that we have stopped demanding that our technology actually work Broussard a software developer and journalist reminds us that there are fundamental limits to what we can and should do with technology With this book she offers a guide to understanding the inner workings and outer limits of technology and issues a warning that we should never assume that computers always get things right Making a case against technochauvinism the belief that technology is always the solution Broussard argues that it's just not true that social problems would inevitably retreat before a digitally enabled Utopia To prove her point she undertakes a series of adventures in computer programming She goes for an alarming ride in a driverless car concluding the cyborg future is not coming any time soon uses artificial intelligence to investigate why students can't pass standardized tests deploys machine learning to predict which passengers survived the Titanic disaster and attempts to repair the U.S. campaign finance system by building AI software If we understand the limits of what we can do with technology Broussard tells us we can make better choices about what we should do with it to make the world better for everyone Libraries, Globalisation and Cooperation Herbert K. Achleitner, Alexander Georgiev Dimchev, 2005 Reference and Information Services Kay Ann Cassell, Uma Hiremath, 2023-01-17 From the ongoing flood of misinformation to the swift changes

occasioned by the pandemic a myriad of factors is spurring our profession to rethink reference services Luckily this classic text is back in a newly overhauled edition that thoughtfully addresses the evolving reference landscape Designed to complement every introductory library reference course Cassell and Hiremath's book also serves as the perfect resource to guide current practitioners in their day to day work It teaches failsafe methods for identifying important materials by matching specific types of questions to the best available sources regardless of format Guided by a national advisory board of educators and experts this thoroughly updated text presents chapters covering fundamental concepts major reference sources and special topics while also offering fresh insights on timely issues including a basic template for the skills required and expectations demanded of the reference librarian the pandemic's effect on reference services and how the ingenuity employed by libraries in providing remote and virtual reference is here to stay a new chapter dedicated to health information with a special focus on health equity and information sources selecting and evaluating reference materials with strategies for keeping up to date a heightened emphasis on techniques for evaluating sources for misinformation and ways to give library users the tools to discern facts vs fake facts reference as programming readers advisory services developmentally appropriate material for children and young adults and information literacy evidence based guidance on handling microaggressions in reference interactions featuring discussions of cultural humility and competence alongside recommended resources on implicit bias managing assessing and improving reference services and the future of information and reference services encapsulating existing models materials and services to project possible evolutions in the dynamic world of reference
