Systems of Insight for Digital Transformation: Using IBM Operational Decision Manager Advanced and Predictive Analytics Whei-Jen Chen, Rajeev Kamath, Alexander Kelly, Hector H. Diaz Lopez, Matthew Roberts, Yee Pin Yheng, IBM Redbooks, 2015-12-03 Systems of record SORs are engines that generate value for your business. Systems of engagement SOE are always evolving and generating new customer-centric experiences and new opportunities to capitalize on the value in the systems of record. The highest value is gained when systems of record and systems of engagement are brought together to deliver insight. Systems of insight SOI monitor and analyze what is going on with various behaviors in the systems of engagement and information being stored or transacted in the systems of record. SOIs seek new opportunities, risks, and operational behavior that needs to be reported or have action taken to optimize business outcomes. Systems of insight are at the core of the Digital Experience which tries to derive insights from the enormous amount of data generated by automated processes and customer interactions. Systems of Insight can also provide the ability to apply analytics and rules to real-time data as it flows within, throughout, and beyond the enterprise applications, databases, mobile, social, Internet of Things to gain the wanted insight. Deriving this insight is a key step toward being able to make the best decisions and take the most appropriate actions. Examples of such actions are to improve the number of satisfied clients, identify clients at risk of leaving and incentivize them to stay loyal, identify patterns of risk or fraudulent behavior and take action to minimize it as early as possible, and detect patterns of behavior in operational systems and transportation that lead to failures, delays, and maintenance and take early action to minimize risks and costs. IBM Operational Decision Manager is a decision management platform that provides capabilities that support both event-driven insight patterns and business rule-driven scenarios. It also can easily be used in combination with other IBM Analytics solutions as the detailed examples will show. IBM Operational Decision Manager Advanced along with complementary IBM software offerings that also provide capability for systems of insight provides a way to deliver the greatest value to your customers and your business. IBM Operational Decision Manager Advanced brings together data from different sources to recognize meaningful trends and patterns. It empowers business users to define, manage, and automate repeatable operational decisions. As a result, organizations can create and shape customer-centric business moments. This IBM Redbooks publication explains the key concepts of systems of insight and how to implement a system of insight solution with examples. It is intended for IT architects and professionals who are responsible for implementing a systems of insights solution requiring event-based context pattern detection and deterministic decision services to enhance other analytics solution components with IBM Operational Decision Manager Advanced.

Digital Transformation with IBM Application Discovery Suman Gopinath, IBM Redbooks, 2017-09-28 This IBM Redpaper™ publication describes how IBM Application Discovery AD complements IBM z/OS Connect Enterprise Edition and IBM Developer for z/Systems in making older mainframe applications available to the digital world. By using a sample scenario

this publication primarily focuses on how the functionality of AD can be used to discover application programming interface API candidates and how z OS Connect can easily create an API out of the mainframe program It also describes how IBM Developer for z Systems acts as the tool that links the entire transformation Systems of Insight for Digital Transformation Whei-Jen Chen,Rajeev Kamath,Alexander Kelly,Hector Lopez,Matthew Roberts,Yee Yheng,2015 Systems of record SORs are engines that generates value for your business Systems of engagement SOE are always evolving and generating new customer centric experiences and new opportunities to capitalize on the value in the systems of record The highest value is gained when systems of record and systems of engagement are brought together to deliver insight Systems of insight SOI monitor and analyze what is going on with various behaviors in the systems of engagement and information being stored or transacted in the systems of record SOIs seek new opportunities risks and operational behavior that needs to be reported or have action taken to optimize business outcomes Systems of insight are at the core of the Digital Experience which tries to derive insights from the enormous amount of data generated by automated processes and customer interactions Systems of Insight can also provide the ability to apply analytics and rules to real time data as it flows within throughout and beyond the enterprise applications databases mobile social Internet of Things to gain the wanted insight Deriving this insight is a key step toward being able to make the best decisions and take the most appropriate actions Examples of such actions are to improve the number of satisfied clients identify clients at risk of leaving and incentivize them to stay loyal identify patterns of risk or fraudulent behavior and take action to minimize it as early as possible and detect patterns of behavior in operational systems and transportation that lead to failures delays and maintenance and take early action to minimize risks and costs IBM Operational Decision Manager is a decision management platform that provides capabilities that support both event driven insight patterns and business rule driven scenarios It also can easily be used in combination with other IBM Analytics solutions as the detailed examples will show IBM Operational Decision Manager Advanced along with complementary IBM software offerings that also provide capability for systems of insight provides a way to deliver the greatest value to your customers and your business IBM Operational Decision Manager Advanced brings together data from different sources to recognize meaningful trends and patterns It empowers business users to define manage and automate repeatable operational decisions As a result organizations can create and shape customer centric business moments This **Digital Transformation** Lindsay Herbert,2017-10-19 One book for the entire journey How to digitally transform your organization Innovation in the face of major external change is critical for any organization s success but attempting to do so often leads to more questions than actions Where do you start How do you get the right resources How should work be implemented What data should you measure For the first time these questions are answered in a single book that covers the end to end execution of digital transformation from leadership level strategy to on the ground team implementation With the biggest revelation of all Herbert argues being that true digital transformation only needs to happen once because at its core it means

becoming more adaptive to change itself Featuring the how to of digital transformation devised from successes across every sector Herbert distils it into five actionable stages These stages act as a repeatable framework for continual innovation allowing you to produce results immediately and grow change incrementally across your organization In Digital Transformation Herbert draws on her own experiences in leading change and innovation programmes globally as well as featuring insights from experts and leaders from organizations as diverse as the World Wildlife Fund Morgan Stanley Royal Caribbean Cruises the United Nations High Commission for Refugees the Rijksmuseum the American Cancer Society The Guardian Harvard University and many others
