S. Nathawat,2024-05-09 Overuse of natural resources results in environmental deterioration lowering the effectiveness of important ecosystem services such as the mitigation of floods and landslides This leads to a greater risk of disaster and in turn natural hazards that can further deteriorate the environment The deterioration of the capacity of the environment to meet social and ecological aims and demands is described as environmental degradation This degradation and the concomitant reduction of ecosystems and their irreplaceable services the benefits humans gain are driving disaster risk Changes to the environment can alter the frequency and intensity of risks as well as our exposure and sensitivity to these hazards Addressing these issues requires improvement of the capacity to perform short and medium term operations in disaster management based on long term environmental considerations At the local level minimizing environmental degradation and ecosystem loss involves awareness of the links between unsustainable development and poverty Communities are often driven to ruin their natural environment as a short term coping mechanism for dealing with

immediate issues for instance surviving a bad harvest by selling wood Strategies for decreasing poverty by investing in environment sensitive development should therefore support initiatives to minimize disaster risk and build resilience There are common aspects in successful policies throughout various regions at the policy level which extends to controlling climate change Tools such as integrated water resources and coastal zone management the removal of environmentally harmful subsidies especially on fossil fuels and or carbon taxes renewable energy marine protected areas and cross boundary biodiversity conservation are all examples of policies used in more than one region but customized to each context This scoping study finds and assesses available materials that relate environmental challenges and management with catastrophes and risk reduction activities in the Asia Pacific area This volume s analysis relies on case studies examples and the results of questionnaires and interviews of practitioners and organizations operating in the environment disaster and development domains
