Disciplining Democracy Development Discourse And Good Governance In Africa:

Disciplining Democracy Rita Abrahamsen,2000-12 Examines contemporary development theory and discourse and explores its relationship to processes of democratization in sub Saharan Africa Focuses on the emergence and implementation of the good governance discourse Draws on examples from four countries to demonstrate the impact of structural adjustment on economic and social conditions and describes the activities of democracy movements opposed to adjustment programmes Concludes that the good governance agenda has been largely unsuccessful in promoting stable multi party democracies in Africa

Class Struggle and Resistance in Africa Leo Zeilig,2016-12-05 This collection of essays and interviews studies class struggle and social empowerment on the African continent

Good Governance in Nigeria Portia Roelofs,2023-04-20 Drawing on original fieldwork in Nigeria Portia Roelofs argues for an innovative re conceptualisation of good governance Contributing to debates around technocracy populism and the survival of democracy amidst conditions of inequality and mistrust Roelofs offers a new account of what it means for leaders to be accountable and transparent Centred on the rise of the Lagos Model in the Yoruba south west this book places the voices of roadside traders and small time market leaders alongside those of local government officials political godfathers and technocrats In doing so it theorises socially embedded good governance Roelofs demonstrates the value of fieldwork for political theory and the associated possibilities for decolonising the study of politics Challenging the long held assumptions of the World Bank and other international institutions that African political systems are pathologically dysfunctional Roelofs demonstrates that politics in Nigeria has much to teach us about good governance

Good Governance in the Middle East Oil Monarchies Martin Hetherington,Tom Pierre Najem,2003-09-02 The concept of good governance is of increasing importance and is used by international organizations to ensure reasonable conformity to high standards in states which participate in the global trading regime and other international activities This book examines the concept of good governance and how it is applied in the states of the Gulf Co operation Council These states are particularly important because of their strategic location and massive oil wealth Moreover as monarchies in most cases without powerful democratic representative bodies and as Islamic countries with a different outlook from countries of the West Western standards of good governance may need to be modified in order for them to be implemented effectively

In the Shadow of Good Governance Gerhard Anders,2009-10-26 In the Shadow of Good Governance traces the implementation of the good governance agenda in Malawi from the loan documents signed by the representatives of the government and the Bretton Woods institutions to the individual experiences of civil servants who responded in unforeseen ways to the reform measures Ethnographic evidence gathered in government offices neighbourhoods and the private homes of civil servants living in Malawi s urban and peri urban areas undermines the common perception of a disconnect between state institutions and society in Africa Instead the book presents a comprehensive analysis of civil servants attempts to negotiate the effects of civil service reform and

Ike Udogu, 2010-02-19 Confronting the Challenges and Prospects in the Creation of a Union of African States in the 21st Century frames the discourse around the important issue of African unification against the backdrop of the region's political and economic marginalization Arguably the richest continent in the world in terms of its abundant untapped natural resources and human capital it still lags behind the other regions of the world developmentally Undeniably Africa is at the crossroads in this millennium within the context of the powerful events and effects of the New Globalization One of the central issues that academics and political actors interested in African development must tackle immediately is how to make the region politically and economically relevant in global affairs These objectives could be attained through continental amalgamation Accordingly this book debates and suggests inter alia strategies that might advance Africa's unification effort in order to provide the politico-economic clout needed to spur continental development Further it argues that such a Union of African States is critical for promoting the good political life for all Africans **Prisoners of Freedom** Harri Englund, 2006-09-12 Publisher Description Working the System in Sub-Saharan Africa Corrado Tornimbeni, 2014-07-08 What is the extent to which democracy good governance liberal citizenship and development are negotiated and shaped in sub-Saharan African countries in the context of the globalised world Is this a characteristic of the current historical era alone Do global ideas about politics and development in sub-Saharan Africa take on new meanings in light of local circumstances and visions The works presented in this volume offer context based analyses that contribute to showing how local practices of citizenship democracy and development in sub-Saharan Africa have been working the system of global ideas on good governance policies and development and how this system also builds on the way in which historically local narratives are presented to actors in the international context Democracy and good governance are considered the universally shared paradigms shaping policy prescriptions and development practices in the context of the current globalised world Space for negotiating these recipes at the local level is considered to be particularly narrow especially in sub-Saharan Africa but it is also believed that international paradigms are

reshaped into peculiar forms when implemented under local circumstances From the early 1990s onwards these processes have drawn the attention of academics as well as the wider public but rarely is their historical dimension taken into account the Africa world nexus in politics and development is not a characteristic of the current global world alone as is too often assumed Adding an historical perspective to the analysis of the multilevel interconnections between local power relations the politics of colonial and independent rule and the global discourses of democracy citizenship and development will contribute to a sound theoretical stance in addressing what is considered the main feature of current times globalisation and its flows That is what this volume tries to accomplish It does so by developing three themes in particular the trajectory of the colonial and independent nation state and its impact on the local and national politics of citizenship identity and development the way global ideas on development are converted into practice or how they are interpreted and negotiated at local level and issues of belonging and identity in relation to concepts and practices of political control Case studies will include Portuguese colonialism Mozambique Tanzania Zimbabwe Senegal Casamance and Uganda

The Handbook of Civil Society in Africa Ebenezer Obadare, 2013-09-21 This volume brings together the most up to date analyses of civil society in Africa from the best scholars and researchers working on the subject Being the first of its kind it casts a panoramic look at the African continent drawing out persisting if often under communicated variations in regional discourses In a majority of notionally global studies Africa has received marginal attention a marginality often highlighted by the usual token chapter Filling a critical hiatus the Handbook of Civil Society in Africa takes Africa African developments and African perspectives very seriously and worthy of academic interrogation in their own right It offers a critical clear sighted perspective on civil society in Africa and positions African discourses within the framework of important regional and global debates It promises to be an invaluable reference work for researchers and practitioners working in the fields of civil society nonprofit studies development studies volunteerism civic service and African studies Endorsements This volume signposts a critical turning point in the renewed engagement with the theory and practice of civil society in Africa Moving from traditional concerns with disquisitions on the appropriateness and possibility of the existence and vibrancy of the idea of civil society on the continent the volume approaches the forms contents and features of the actually existing civil society in Africa from thematic regional and national angles It demonstrates clearly the extent to which core intellectual work on civil society in Africa has largely moved from concerns with cultural reductionism to a nuanced examination of the complexities of formal non formal organizational non organizational traditional newer usual unusual engagements detailing the extent to which over time civil society as a concept has been indigenized appropriated and adapted in the terrains of politics society economy culture and new technologies on the continent In all this the book accomplishes the near impossible Without sacrificing the vigour rigor and freshness of the often unpredictable fruits of up to date research into regional and national differences that crop up in the documentation of Africa s multiple realities and discourses the volume weaves together a rich tapestry of the historical

theoretical and practical dimensions of an expanding civil society sector and accompanying growth in popular discourse advocacy and academic literature in such a diverse continent as Africa into a meaningful whole of insightful themes Written and edited by a very distinguished cross continental and multi disciplinary collection of researchers research students practitioners and activists the volume provides cutting edge evidence and makes a definitive case for a new lease of life for civil society research in Africa Adigun Agbaje Professor of Political Science University of Ibadan Nigeria Throughout Africa forms of civic engagement and political participation have seen dynamic change in recent decades yet conceptions of civil society have rarely accounted for this evolution This volume is an essential source of new thinking about political association and collective action in Africa The authors offer a wealth of analysis on changing organizations and social movements new forms of interaction and communication emerging strategies and issues diverse social foundations and the theoretical implications of a shifting associational landscape The contributors provide an invaluable addition to the comparative literature on political change democratic development and social movements in Africa Peter Lewis Johns Hopkins University School of Advanced international Studies Studying the Agency of Being Governed Stina Hansson,Sofie Hellberg,Maria Stern,2014-09-15 This edited volume seeks to provide guidance on how we can approach questions of governing and agency particularly those who endeavour to embark on grounded empirical research by rendering explicit some key challenges tensions dilemmas and confluences that such endeavours elicit Indeed the contributions in this volume reflect the growing tendency in governmentality studies to shift focus to empirically grounded studies The volume thus explicitly aims to move from theory to practice and to step back from the more top down governmentality studies approach to one that examines how one can does study how relations of power affect lives experience and agency This book offers insight into the intricate relations between the workings of governing and the possibility for people s agency on the one hand and about the possible effects of our attempts to engage in such studies on the other In numerous ways and from different starting points the contributions to this volume provide thoughtful insights into and creative suggestions for how to work with the methodological challenges of studying the agency of being governed This work will be of great interest to students and scholars of international relations global governance and research methods **Reconstructing the Third Wave of Democracy** Rita Kiki Edozie,2009 Since the 1990s trends in African politics require the realization that the public policy practice and the theoretical analysis of democracy and democratization are becoming increasingly important tenets for understanding the contemporary political science of the region Reconstructing the Third Wave of Democracy explains these new political processes and ideas Author Rita Kiki Edozie identifies factors that Africans have encountered since the foundation of the modern African state and presents a critical analysis of African politics through the lenses of post colonial discourse by uniquely employing the ideas of democratic theory to guide an analysis of the Continent s democratic development and performance Edozie presents an intra regional comparative analysis of democratic politics in Africa in ways

that few books on the same subject do for the continent Her methodology for examining democracy in Africa reveals the dynamism of several country cases and several more regime experiences with democracy encountered from the post World War II period to the current post Cold War period

Democratization in Africa: Challenges and Prospects Gordon Crawford, Gabrielle Lynch, 2013-09-13 It is two decades since the third wave of democratization began to roll across sub Saharan Africa in the early 1990s This book provides a very timely investigation into the progress and setbacks over that period the challenges that remain and the prospects for future democratization in Africa It commences with an overall assessment of the lack of progress made from 1990 to 2010 exploring positive developments with reasons for caution Based on original research subsequent contributions examine various themes through country case studies inclusive of the routinisation of elections accompanied by democratic rollback and the rise of hybrid regimes the tenacity of presidential powers the dilemmas of power sharing ethnic voting and rise of a violent politics of belonging the role of donors and the ambiguities of democracy promotion Overall the book concludes that steps forward remain greater than reversals and that typically though not universally sub Saharan African countries are more democratic today than in the late 1980s Nonetheless the book also calls for more meaningful processes of democratization that aim not only at securing civil and political rights but also socio economic rights and the physical security of African citizens This book was originally published as a special issue of Democratization

Bible and Poverty in Kenya Maurice Matendechere Sakwa, 2008-02-28 Many strategies have been formulated to reduce poverty the most recent being the need to include the poor as co agents in the development process Culture understood as commonly shared values then becomes an important element in poverty alleviation Likewise religion becomes an important element of culture when the values of that religion are considered as widespread in the society Additionally political and economic factors are equally important for poverty alleviation This work is centered on a conceptual model postulating that cultural attitudes influence attitudes towards ends of poverty alleviation

directly and indirectly through political and economic attitudes The study maps out the paths of influence of cultural religious values political and economic attitudes on those towards ends of poverty alleviation Dictators, Dictatorship and the African Novel Robert Spencer, 2021-03-01 This book examines the representation of dictators and dictatorships in African fiction It examines how the texts clarify the origins of postcolonial dictatorships and explore the shape of the democratic egalitarian alternatives The first chapter explains the neoliberal period after the 1970s as an effective recolonization of Africa by Western states and international financial institutions Dictatorship is theorised as a form of concentrated economic and political power that facilitates Africa's continued dependency in the context of world capitalism The deepest aspiration of anti colonial revolution remains the democratization of these authoritarian states inherited from the colonial period This book discusses four novels by Ngũgĩ wa Thiong'o Ahmadou Kourouma Chinua Achebe and Chimamanda Ngozi Adichie in order to reveal how their themes and forms dramatize this unfinished struggle between dictatorship and radical democracy
