

Exercises (Assignments) Task 1: Energy Transfer

Work with your Group:

Experimentation: Energy transfer 1st, focus with the thermodynamic 1st and 2nd law. Finally, connect with 3rd law.

1st Exercise Group: How would you demonstrate from the ground state that following law (Energy up and down)? Write in your book about 1st and 2nd law of thermodynamics (1st law: Energy is conserved, 2nd law: Entropy is always increasing)

2nd Exercise Group: calculate thermodynamic state variables, when the state point is specified by the number. The state number will change with temperature.

3rd Exercise Group: specify different states in ground state in energy through space. Sketch it!

4th Exercise Group: the thermodynamic state variables are independent of the state number. Sketch the thermodynamic state number (thermodynamic state) with different specified thermodynamic quantities (Energy, Entropy, ...)

5th Exercise Group: a thermodynamic state is a point in the state space. Sketch the state space.

State space concept: The thermodynamic state space is the space where the state variables are defined. The thermodynamic state space is the space where the state variables are defined.

6th Exercise Group: How would you demonstrate from the ground state that following law (Energy up and down)? Write in your book about 1st and 2nd law of thermodynamics (1st law: Energy is conserved, 2nd law: Entropy is always increasing)

7th Exercise Group: calculate thermodynamic state variables, when the state point is specified by the number. The state number will change with temperature.
a. Write down the thermodynamic state variables.
b. How would you demonstrate from the ground state that following law (Energy up and down)?

presented are parallel to those found in a traditional physics text making for straightforward integration into a typical lecture based physics course Users will appreciate the ease at which compelling OpenGL based graphics and animations can be produced using PhysGL as well as its clean simple language constructs The author argues that coding should be a standard part of lower division STEM courses and provides many anecdotal experiences and observations that include observed benefits of the coding work
